I'm so proud of myself for both fundraising enough for smidge and working so hard that I can pay for her. I've ordered her tags, im making her a little bag full of goodies for Tuesday when I see her, and I'm just so so proud of myself for getting this accommodation 🐾🧡

Art & Post by Elrose, Illustrator & Project Manager
Hey folks, as I mentioned last week, there's nothing to share on the writing front this week. Winter is in the process of moving, flying out tomorrow. Hope to have more to talk about next week!
Just so there's something here, I've added a sketch I made of the undead moose from the new Chapter 1. We're playing around with the interior illustrations being part of the fictional world - meaning Rieka drew this herself. Still figuring out what her drawings would look like. Patrons can see some previous attempts below.

30 SEPTEMBER 2025, ELROSE CONFIRMED MILO'S RELOCATION TO FINLAND, LATER CONFIRMED BY MILO HIMSELF IN HIS HIGH DISTURBANCE ESSAY.

9/30 Update - Settling In
Sep 30, 2025
by Elrose, Illustrator & Project Manager
Art by M.
Audra has completed the relocation! She & Sauli have already been working on what's next - some new writing is coming soon. The goal was today, but Winter had a health scare that kept her bedbound or at the doctor's for all of yesterday & today. Currently recovering after some treatment. Here's what's coming up:

Artist Statement

So, where am I now, and what led me here?

This piece, which started in August, was written in Colorado, Washington, Alaska, Kansas, North Carolina, Finland, Sweden, and, at last, Norway. Here in Norway, I am working alongside Sauli, WOG's art director, as we strive to reimagine the second version of *The Age of Scorpius*. Turns out, a lot can happen in a two-month time span!

THE REGULATIONS CONCERNING THE IMPORTATION OF DOGS, CATS, AND FERRETS — SERVICE ANIMALS ARE NOT AN EXCEPTION.

FROM THE FINNISH FOOD AUTHORITY:

HTTPS://WWW.RUOKAVIRASTO.FI/EN/THEMES/IMPORT-AND-EXPORT/IMPORT/ANIMALS-AND-ANIMAL-PRODUCTS/ANIMALS-AND-GAMETES/DOGS-CATS-AND-FERRETS/IMPORT-OF-DOGS-CATS-AND-FERRETS/

Import of dogs, cats and ferrets

This page deals with **IMPORTING** dogs, cats or ferrets. Such situations include:

- The animal travels alone, and the owner does not travel at all (e.g., animals ordered online).
- The animals are intended for further delivery/sale within the EU.
- The number of individual animals of different species exceeds 5.
- There is a gap of more than 5 days between the travel of the animal and its owner.

In these situations, a border veterinarian inspection is required.

If you are traveling with your own pet, please proceed to the MOVEMENT page.

Import conditions

Import is allowed only from specific countries. If the country of origin is not listed in annex VIII in regulation 2021/404, import is not permitted.

Animals can be **imported** to Finland **from outside the EU** only through Helsinki Airport or Vaalimaa land border crossing point.

NOTE! Check the box at the bottom of the page if the animal arrives through Helsinki Airport.

1. Identification

The animal must have identification (microchip or a clearly readable tattoo issued before July 3, 2011) before administering the rabies vaccination.

Technical Requirements for Microchips

Microchips must

- conform to the ISO 11784 standard and use HDX or FDX-B technology; and
- be readable with a reader applying the ISO 11785 standard

2. Rabies vaccination

Post-vaccination procedures for rabies vary, so check whether a rabies antibody test is required for animals coming from the country of origin!

- Rabies vaccination can be given earliest at 12 weeks of age
- After the rabies vaccination

EITHER

- A waiting period of minimum 21 days if there is no indication of a rabies antibody titration test for the country of origin on this list
- The validity of the vaccination starts no earlier than 21 days from the first vaccination
- All subsequent vaccinations must be given during the validity of the previous vaccination, or else the vaccination program must be restarted
- In this case, the animal must be at least 15 weeks old when entering the EU

OR

- Rabies antibody test earliest 30 days after vaccination if there is an indication of "Rabies antibody titration test" in the country of departure on annex VIII in regulation 2021/404
- The antibody sample must be analyzed in an EU-approved laboratory (EU Commission)
- The test result must be 0.5 IU/ml or higher
- After the sample is taken, a waiting period of minimum 3 months in the country of departure (calculated from the sampling date) applies
- The validity of the rabies antibody test corresponds to the validity of the rabies vaccination
- In this case, the animal must be at least 7 months old when entering the EU

3. Anti-echinococcus treatment (for dogs only)

Echinococcosis treatment (against *Echinococcus multilocularis*) is to be administered at least 1 and at most 2 days (48-24 h) before the dog's arrival in Finland (NOTE: The time is calculated from crossing the border, not the departure time). Any veterinarian can administer the medication, and it is recorded on the EU model health certificate (see below).

4. EU model health certificate (including clinical examination)

The pet must have an EU-model health certificate for import (model CANIS-FELIS-FERRETS) issued by an official veterinarian in the country of origin, see the certificate template in the link bar. The certificate includes a clinical examination performed by the official veterinarian within 48 hours before departure. The health certificate can be issued when all associated measures have been completed.

The health certificate is valid for 10 days from the date of issuance. The certificate must be original and accompany the animal throughout the journey.

We strongly recommend scanning the health certificate and other documents to lentoasema@ruokavirasto.fi well in advance before the animal departs, to ensure the correct certificate model and compliance with import requirements.

5. Other conditions

Requirements for the animal's place of departure:

- No restrictions due to rabies situation should apply to the place of departure
- The place of departure must have an address

Check the general import conditions

Check additional requirements for cats and dogs coming from Australia and Malaysia

Documents to be carried with the animal:

- Original vaccination and identification documents or their certified copies (for example vaccination booklet)
- Possible rabies antibody test certificate as an original or certified copy (see above, whether needed for the country of origin)
- EU-model health certificate issued by an official veterinarian (see above)

Border crossing and veterinary border inspection

The animal must undergo a veterinary border inspection in the first EU member state it arrives in.

Carefully read the instructions on preparing for the border inspection and the process of the inspection on this page. The page also provides information on related fees and gives specific instructions regarding import pets collected from Helsinki-Vantaa Airport.

Veterinary border inspection posts in Europe (EU Commission)

Note this!

Animals imported by air, whose owner does not travel, can only arrive as cargo. The Helsinki-Vantaa border control post is not located in the passenger terminal but further away in the cargo terminal. In practice, it is not possible to inspect the imported animal according to the

legislative requirements at the border control post if the animal arrives at the passenger terminal.

In some cases, it has been observed that pet escort services attempt to bypass the veterinary border inspection when the escorts transport animals as their own pets with the intention of subsequently handing them over without the required veterinary border inspection. **Such activity is illegal.** If the animal is brought with an escort to a new owner, its entry into the EU may be refused (rejection). In this case, **the animal can either be returned to the country of departure or euthanized**.[1)]

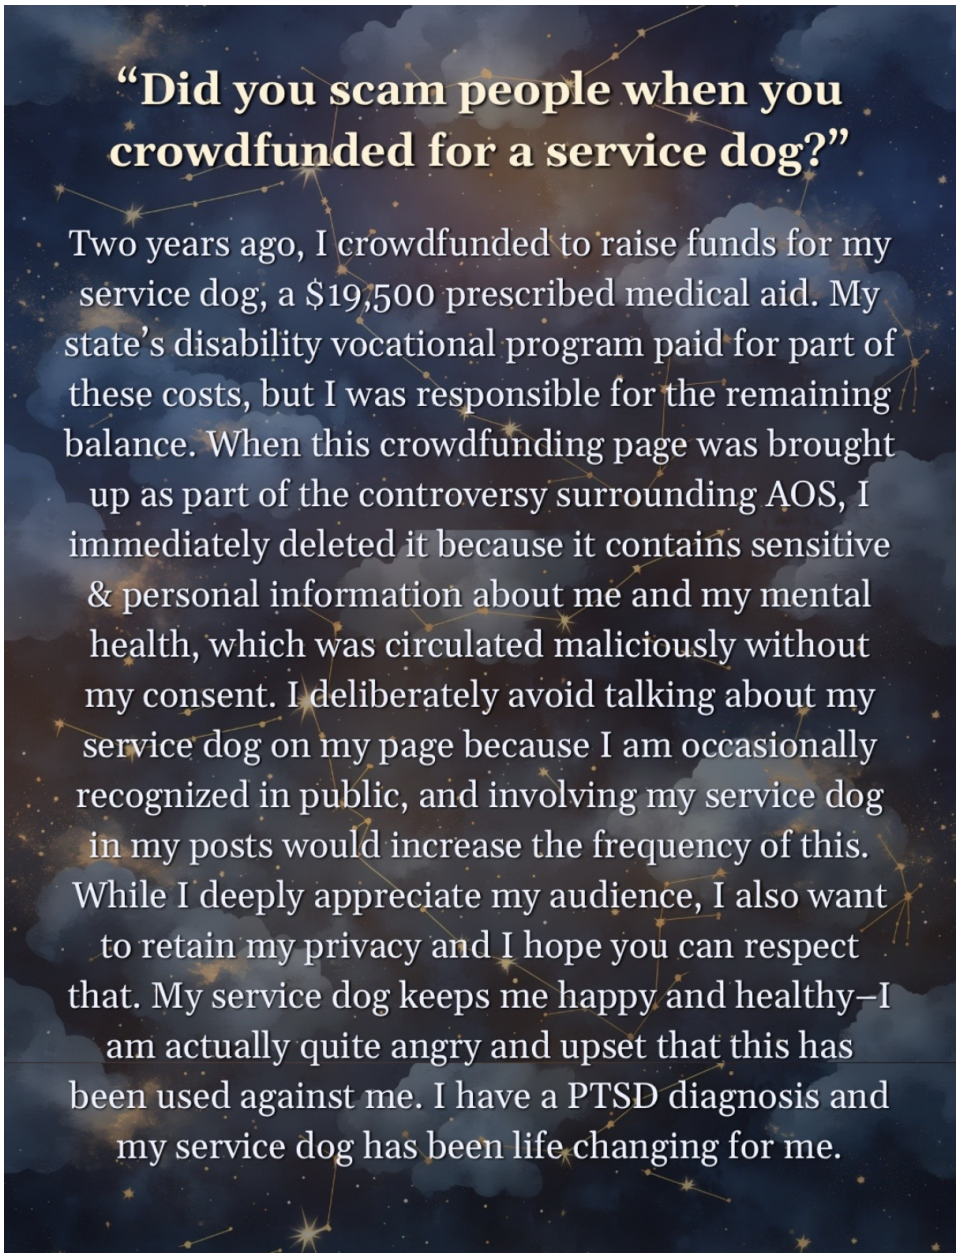
MILO POSTED THIS TO HIS PATREON ON 11 AUGUST 2025.

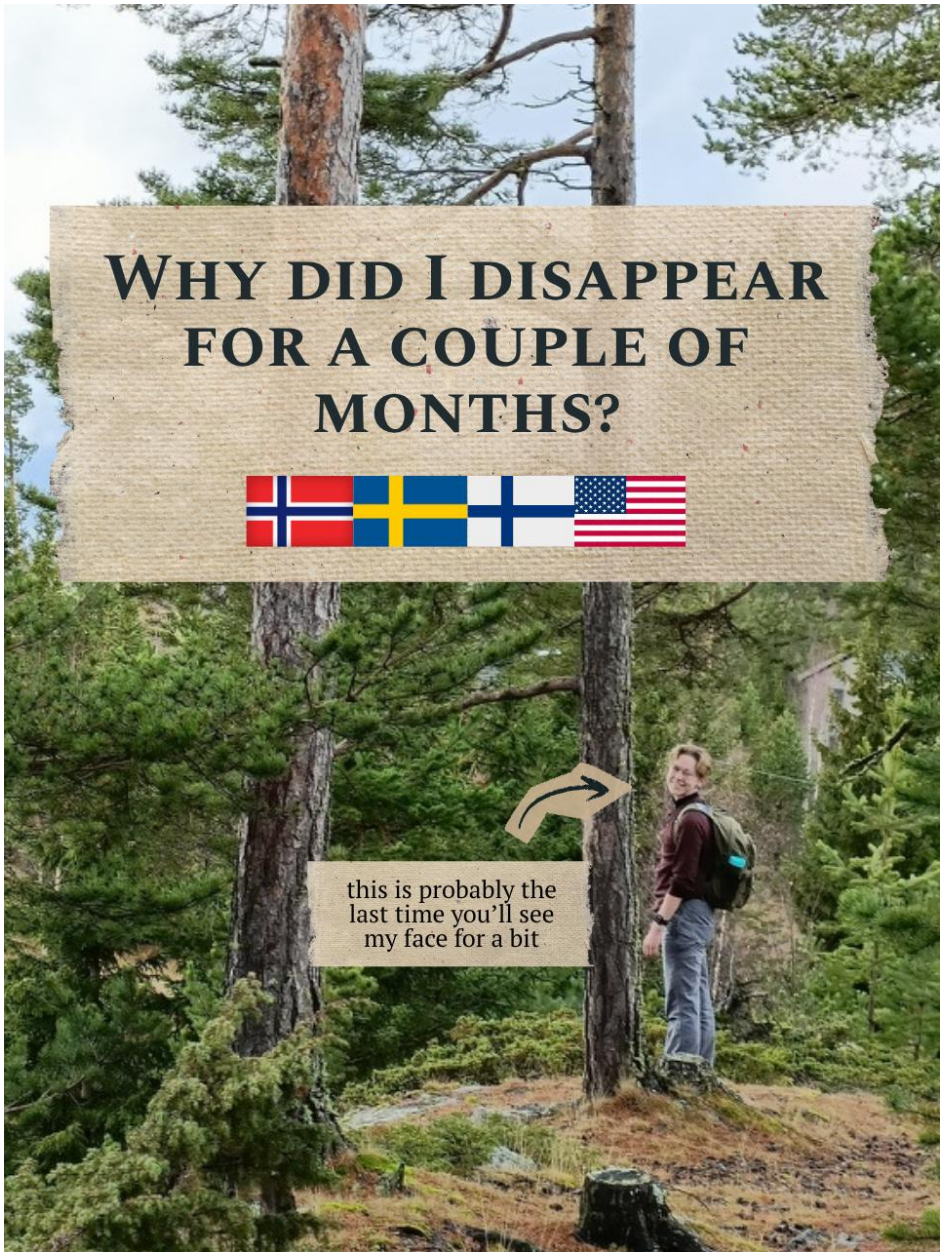
ORIGINAL LINK: HTTPS://WWW.TIKTOK.COM/@MILOWINTERWRITES/PHOTO/7537457890408271134?IS_FROM_WEBAPP=1&SENDER_DEVICE=PC&WEB_ID=7609378268059518478



"Did you scam people when you crowdfunded for a service dog?"
Two years ago, I crowdfunded to raise funds for my service dog, a $19,500 prescribed medical aid. My state's disability vocational program paid for part of these costs, but I was responsible for the remaining balance. When this crowdfunding page was brought up as part of the controversy surrounding AOS, I immediately deleted it because it contains sensitive & personal information about me and my mental health, which was circulated maliciously without my consent. I deliberately avoid talking about my service dog on my page because I am occasionally recognized in public, and involving my service dog in my posts would increase the frequency of this. While I deeply appreciate my audience, I also want to retain my privacy and I hope you can respect that. My service dog keeps me happy and healthy–I am actually quite angry and upset that this has been used against me. I have a PTSD diagnosis and my service dog has been life changing for me.

THEN MILO POSTED THIS TO HIS TIKTOK ON 13 NOVEMBER 2025.

ORIGINAL LINK: HTTPS://WWW.TIKTOK.COM/@MILOWINTERWRITES/PHOTO/7572233355450649887?IS_FROM_WEBAPP=1&SENDER_DEVICE=PC&WEB_ID=7609378268059518478



WHERE IS THE DOG

Link: For additional commentary and information, please see Seoulmama's series on Winter, which also includes details about the service animal.
